Editorial

Religion In the Space Age

Far from limiting the importance of religion, our modern scientific advances underscore the need for a more dynamic and vital religious faith. In the race to conquer space, we should not lose sight of moral and spiritual values. For, when the count reaches zero, all we can do is pray.

Certainly the U. S. needs the best possible system of military defense. But our real security is based on the spiritual strength of the American people. Fundamentally, we grow stronger as we come to depend more upon God's help for the courage and patience to live through these trying times.

That is why we cannot entrust the safety of our future solely to our growing military establishment. Our future is in God's hands, and we must look to Him in prayerful humility for the disciplined strength of character and spirit needed to win through to a world of peace and justice.

We are living in a truly remarkable age. Now that satellites are commonplace, and the energy of the atom is being used increasingly for peaceful purposes, we can look forward hopefully to even greater scientific revelations and achievements.

These will be further evidences of not only what man can achieve but also of the marvelous universe God has created. As the universe yields its secrets, new and immense dimensions will be added to man's knowledge of God's Creation.

That is why the national Religion in American Life Program calls upon all Americans to worship regularly in the House of God. In acknowledging that all final power over this world remains in God's hands, it is possible to "Find the strength for your life."

The Christmas season offers all of us an excellent opportunity to renew our ties with the church of our choice and to resolve that in the New Year we will make regular church attendance a part of our weekly pattern of living.

Report on A Decade

This issue of the **Sandia Corporation Lab News** is somewhat of a milestone. It was 10 years ago yesterday that the first printed Sandia employee publication was distributed. This issue is the 265th to go to Sandia employees.

Starting off with a modest format, the publication was first known as the **Sandia Bulletin**. Later the name was changed to the **Sandia Lab News** and after Sandia Corporation opened Livermore Laboratory in California the title became **Sandia Corporation Lab News**.

Despite fears 10 years ago that the publication would soon run out of news due to limitations of security, the **Lab News** continually finds itself faced with a surplus-of-material problem.

Perhaps the next 10 years, with the advent of new peacetime applications of atomic energy, will see new areas of coverage open up for the **Lab News**.

However, the paper will continue to be mainly about Sandia people and for Sandia people. We hope they continue to provide us with material so we may tell of their lives, their work, their tribulations, and their triumphs.

Above all, we hope Sandia Corporation becomes even better known to its employees and these employees better known to each other.—The Editor

Alena Opperman (8232-1)

Take a Memo, Please

Avoid holiday hazards so you will have a Merry Christmas and a Happy New Year.

Wanted (Badly):
Copy Jan. 22, 1960,
Issue of Lab News

The LAB NEWS maintains a file of back issues of the paper which is used for reference purposes and special requests. The file is complete except for the issue of Jan. 22, 1960. If any employee has a copy of this particular paper, the LAB NEWS would certainly like to have it. Send it to LAB NEWS, Org. 3431-1, Bldg. 829.

In "Who's Who"

Ellen Cunningham (8233-2) has been recognized in the current issue of "Who's Who in the West" for her work with amateur choral organizations in Livermore and elsewhere.

Ellen, who is also listed in "Who's Who of American Women," has served in Livermore as director of choirs at the First Presbyterian Church, and chairman of the Livermore Valley Festival of Sacred Music. She also has been active in choir work elsewhere in California and New Mexico.

Congratulations

Born to:

Mr. and Mrs. John Kinney (1423) a son, Michael John, on Nov. 20. Kinney formerly worked in Division 4151.

Mr. and Mrs. Orville L. Howard (7234) a daughter, Rene Suzanne, on Dec. 1. Georgia formerly worked in Division 3126.

Mr. and Mrs. William E. Walker (7133-3) a son, Jeffrey, on Nov. 29.

Mr. and Mrs. George L. Adkins (7133-2) a son, Lawrence Allen, on Dec. 4.

Mr. and Mrs. John R. Ames (1424-3) a daughter, Christine Elizabeth, on Nov. 21.

Mr. and Mrs. K. W. Drake (2541) a son, Raymond Earl, on Dec. 10.

Mr. and Mrs. Esquipulo Baca (8232-2) a son, John Peter, on Dec. 4.

Mr. and Mrs. George Grant (4152-2) a son, Gregory George, on Dec. 9.

Mr. and Mrs. Warren Arthur (4573) a daughter on Dec. 2.

Mr. and Mrs. Larry Tichenor (4224-2) a daughter, Tammara Rochelle, on Dec. 18.

G. A. Fowler Visits
Sandia Office at
Cape Canaveral

Sandia Corporation Field Test personnel at Cape Canaveral were visited recently by Glenn A. Fowler, Vice President, Development, 7000.

Mr. Fowler gave an informal briefing on activities at Sandia Laboratory. Afterwards Mr. Fowler and V. K. Smith, supervisor of AFMTC Operations Section, inspected the missile facilities on the Cape. This inspection included a quick look at the Mercury project.

A dinner at Holiday Inn, Cocoa Beach, was attended by G. A. Fowler, V. K. Smith, R. D. Pace, W. L. Gault, W. M. Snyder, W. P. Roper, G. W. Mead and Letha Stewart. During dinner the dining room was empty for a brief time as everyone ran out to see the launching of an Atlas missile.

Christmas Parties

Wrapping up the many organization Christmas parties held at Livermore Laboratory will be the Division 8116 party planned for tonight at the home of Chris Laggis (8116-2) and the 8114-3 party at the home of Alyce Loveless (8114-3). Arrangements for the 8116 party were made by Barbara Cordoza (8116-2), Bobbie Myers (8116), and Irmal Brown (8116-2).

Nat'l Golf Officer

John Olson (4424) was elected secretary of the Western Senior Amateur Golfers Association, which organized during the national tournament Dec. 7-11 at Palm Springs, Calif.

The association covers an 11-state area.

NOVEL CHRISTMAS TREE and bell, shown here with Phyllis Bell and Carlene Mohr (both of 8115) were made from scraps of paper honeycomb. The honeycomb was developed by the Materials Application Division (8115). Phyllis shows what the tree looks like before it is finally assembled.

Lu Nelson Sings

Featured vocal soloist at the second annual fall rally of the Christian Women of the U.S.A., held Dec. 3 in Oakland, was contralto Lu Nelson (8233-2) of Livermore Laboratory. Lu sang five solos for the 400 women present and led group singing to round out the musical program.

7300 Holiday Party

A "Holiday Party" will be held by members of 7300 in the Coronado Club ballroom from 8:30 p.m. to 12:30 on Dec. 30. Chips and dips will be provided for guests, according to co-chairmen Bill Johnson (7321) and R. L. Henderson (7311). Tommy Kelly's combo will play for dancing.

LITTLE GIRLS' DELIGHT are these miniature dolls made by Sondra Hunter (8212-3), Livermore Lab News reporter.

LARGE CHRISTMAS tree, made from aluminum shavings and scraps, was created by Pauline LaForest (left) and Inez Gay for the enjoyment of their co-workers in Section 4234-1. A winter scene complete with snow and twinkling stars completes the setting. The section plans a holiday dinner sometime later this month.

Warm Weather
Wanderers

A tropical Christmas is planned by Cecile McIntosh (8212-3) and Lorena Schneider (8100) of Livermore Laboratory. They left Dec. 20 by plane, bound for the Yucatan Peninsula in Mexico.

Their itinerary includes eight days in Yucatan, where they will visit world famous Mayan temples, buildings, and village ruins in the archaeological wonderland. Part of the trip in the Yucatan jungles will be by Model T Ford or Jeep, provided by a local travel agency.

They plan to celebrate New Year's Eve in Mexico City and spend an additional week sight-seeing in the capital city, taking in a bull fight on New Year's Day.

Wedding

Congratulations are extended to Evelyn Cook (4423) and Harry Schultz on their recent marriage. The couple exchanged vows in Tucson, Ariz., and honeymooned in Guaymas, Mexico.

Evelyn has been with the Corporation since July 1951.

Ski Club Plans Trips

The Livermore Laboratory Ski Club presented a slide program at its second meeting of the season Dec. 21 and showed scenes of the ski area at Alta, Utah. The slides were furnished by Jim Hause, a security inspector at Livermore Laboratory.

The club is now planning trips for the coming season and persons wishing to participate should contact Barbara Atkinson (8114-3).

Jim Hay Back at
Sandia After Service
With U. S. Army

James L. Hay has returned to Sandia after military service to resume his training as an appren-

tice machinist in Project Section 4254-2.

During his two years in the Army, Jim was stationed most of the time at Hanford, Wash., where he was a sentry dog handler. He was in charge of four German shepherds.

Jim first came to work at Sandia in August 1956. His wife, the former Barbara Carey, also worked here before Jim went into the Army.

Sympathy

To Helen Besser (3220) for the death of her husband on Dec. 10.

To J. D. Benton (8122-1) for the death of his father in Livermore Nov. 27.

To S. G. Cain (8122-3) for the death of his father in Oklahoma Dec. 4.

To Glenn D. Wright (2724-2) for the death of his wife, Frances (3452), on Dec. 12.

To B. C. Brown (4224) for the death of his mother on Dec. 5.

To Henry Roeder (4224-3) for the death of his wife on Dec. 17.

To Walter Scott (4424) for the death of his son in New Jersey, Dec. 7.

Sandia Employees Go All-Out With Help for Needy

Sandia employees are again this year helping to make Christmas a little brighter for less fortunate people. The Christmas charity projects are undertaken by many organizations in lieu of exchanging cards with fellow workers.

Several Sandia organizations helped the International Brotherhood of Electrical Workers Union with its Christmas project of helping underprivileged children. They are 2723, 2713, 2451, 4231, 4234-1, 4233, 4511, 1110 and 1120, besides several other employees from throughout the Corporation.

Employees each took the name of a child and bought a gift which was presented at the IBEW Christmas party for the children at Washington Junior High School last Saturday.

The children also need shoes and clothing and anyone who wishes to donate articles to them should call Ed Jenkins or Phil Rogers, both on ext. 43261, or Charles Judd, ext. 41151. These men will see that donations are picked up and delivered.

The local is comprised of about 200 Sandia Laboratory electricians and electronics workers.

"We asked all interested persons to contribute gifts for the children," said C. M. Judd (4234), president of the local.

The children ranged in age from six to 12 and were selected from the Albuquerque area by various welfare agencies.

As in the past two years, members of Military Liaison, 2300, are buying shoes for needy children of Riverview School. Last year the money they gave bought over 30 pairs of shoes.

Desi Baca, principal at Riverview, said that this gift was the only Christmas present some of the children received last year. Bob Brooks (2331) is chairman of the project again this year.

Adopt Family
Organization 4150 is adopting a family which has six boys and one girl, ages 2 to 11 years. The father is hospitalized and is not expected to live. Besides making up a food basket, donating clothing and toys, employees have also given cash which will be used to buy items not received through donations. The group already has four boxes ready to go. This is the fifth year the organization has adopted a family.

Five needy families (33 children in all) will be taken care of by employees of 4250 this Christmas. They have collected over \$200 in cash plus many big boxes filled with canned foods and clothing. In addition to the canned foods, each family will receive a bountiful supply of groceries which are too numerous to mention. The employees have also collected many toys and will buy additional toys so that there will be at least one toy for each child.

"It's a lot of work," says Lab News reporter Peg Taylor (4250), "but helping with these projects is a most rewarding experience."

Each child at the All Faith's Home will receive an individual gift from members of 4360. Employees are giving cash to buy gifts, and also will donate clothing, toys and school supplies for the children. Chairmen of the project are Bill Purchase (4361) and Oleta Morris (4333).

Personal gifts for patients in the Infirmary for the Aged at Presbyterian Sanatorium will be given by employees of 4330. A gift-wrapping session was held during the noon hour last week with all members of the department pitching in to help.

A white elephant sale will be held by Division 3466 to raise money for a needy family. Employees will do their bargaining during a potluck lunch for all members of the division. In addition,

they're bringing in canned goods and clothes for the family. Carlston Luker and Bea Haines are chairmen of the sale.

Cash Donations
For the second year, members of 5110 are collecting money which will be given to the Department of Public Welfare, 117 Trumbull SE. Department 7130 personnel will also give a cash donation to the Welfare department. The money, together with unused or outgrown clothing, will be taken to the department just before Christmas.

Between 15 and 20 families will receive food baskets as a result of the generosity of Drafting Department 4410. Half the names were supplied by a Catholic parish and half by a Protestant church. A. L. "Will" Ouellette is chairman of the project. The baskets will be delivered on Dec. 23.

Department 4130 has adopted two families for Christmas and is raising money by selling articles handmade by members of the department. Both of the families are fatherless. One mother, who is a deaf mute, has four children; the other family has five children. Grocery certificates will be presented to each mother, along with toys for the children.

Family Care
Through the Department of Public Welfare, Department 3130 has located a family of seven children which needs assistance. The father, the only breadwinner, has been in the hospital for some time. The children, five girls and two boys, range in age from 6 to 15. Members of the department are donating cash, clothes, food, linens, blankets and other essential items.

A total of \$317 has been collected in 7200, and the money will be used primarily for food baskets for the needy. A small portion will go to the lunch fund at Stanley School near Galisteo. W. T. Smith, chairman of the project, says that credit and thanks for the posters should be given to Cynthia Kelly (3113).

Divisions 2714, 2715 and 2716 have chosen to help two needy

families this Christmas and the All Faith's Home. Their committee consists of Charlie Abeyta, Dorothy Fletcher, George Goldsworthy, Edith Duffy and Jack Smith.

Collecting Food
Employees of Division 4424 are collecting food for a needy family. In addition, the group is giving the excess money from their coffee fund to the All Faith's Home. Division 4421 is also giving food to a needy family.

All of the money collected by 7500 will be given to the All Faith's Home. Committee members are Mary Pasko (7510), Jim Hillman (7520) and Mildred Johnson (7530). Personnel of 2641 will also donate money to the home.

Grocery packages for needy families is the project undertaken by 7300. Division secretaries are collecting money and it will be turned over to a committee which will make up the food lists and buy the groceries. Committee members are C. L. Sparks (7321), J. C. DeBaca (7322), R. L. Shuman (7311), J. T. LaPoint (7312), and F. B. Brown and W. J. Owens (both 7323, Area 3).

Department 5130 is collecting money for a needy family whose name was obtained from a Mission in Albuquerque. Val Hruska (5130) is heading the project.

Help Co-Worker
Helping out a fellow worker who has been hospitalized for some time is Division 4623's project. The group is donating money to him and in addition, 4623-3 is giving a ham to his family for their Christmas dinner.

Members of 3420 and 3431 are donating clothes, toys and food which will be given to needy families in the Tijeras Canyon area.

Department 4210 employees have adopted a fatherless family with five children. The group is providing furniture, dishes, toys and clothing, and with the money collected, they are buying a food basket and additional toys and clothes. Committee members are Charlie Horner (4211), Elmer Goepfert (4211) and Virgie Haverly (4212).

GIFT WRAPPING SESSION, held during the noon hour in Division 4333, found these ladies really getting into the Christmas spirit. They are (l to r) Erma Campbell, Wanda Cupp and Dorothy Hummer. Like many other Sandia organizations, this group is helping less fortunate persons at Christmastime instead of exchanging cards with fellow workers. The corporation encourages this practice.

Coronado Club Program Full During Year-End Holidays

Horns, hats and favors will be supplied for the Coronado Club's annual New Year's Eve party from 9 p.m. to 1 a.m. A breakfast is included in the admission price which is \$3 for members, \$4 for guests.

Leigh Sprague's orchestra will be playing in the ballroom, and the M.B.C. Trio will fill La Cana room with music for dancing.

The club's annual free cocktail party will be held on Monday, Jan. 2, from 3 to 5 p.m. Attendance is limited to members only.

New dance classes for Coronado Club members will begin Jan. 10 in the club ballroom. Beginners will meet at 7 p.m. and advanced students at 8:30. Cost of the 10-week course is \$6 per person.

Registration will be held the first class night, according to instructors Charles (3452) and Holly (4131) Balistrere and Gail (3463) and Jennifer Ward. Both Latin American and American dancing will be taught.

During January there will be four Friday night social hours with live music and buffet dinners. Social hours will be from 5:15 to 6:45 p.m., buffet lines will be open from 6 to 7:30, and music for dancing will be provided from 5:30 to 8:30.

Two Saturday night dances, the monthly buffet dinner-dance, and a teenage dance party are also scheduled for January.

Free dips and snacks will be available in the lounge every evening from 5 to 7 except on Friday and Sunday.

**OUR BEST WISHES
TO ALL OF YOU
IN SANDIA CORPORATION
AND TO YOUR FAMILIES
FOR A MERRY CHRISTMAS
AND A HAPPY NEW YEAR**

NO SNOW in Livermore failed to daunt the Guy Willis family (8124) in getting into the spirit of the Christmas holidays. Here Guy and Doti Willis and their children (from top, left) Becky, 3, Dave, 6, and Mike, 8, get a possible preview of Christmas morning.

PANORAMA of Christmas in the Sierras during pioneer days, the theme of the Livermore Laboratory Christmas display, gets final touches from its designer Mill Taylor, left, and Frank Parr.

MINIATURE MODEL of Livermore Laboratory Christmas display is studied by Mill Taylor to determine proportions he will use in the finished product. The small model and the cut-out figures were made from heavy grade cardboard. Small twigs were used to simulate "trees."

Livermore Holiday Display Took Planning, Research

Livermore Laboratory is again featuring a display of traditional "luminarias" during the Christmas season, highlighted this year by the addition of a large California scene mounted on the roof of the administration building.

The huge scene, measuring 14 by 40 feet, depicts a Christmas celebration in the Sierras observed by the pioneers on their way west. The design is the work of Millard Taylor, technical illustrator in Section 8232-5, who was assisted by Frank Parr and Harold Peterson, both of 8222-2, in preparing the finished scene. "Mill" outlined the giant mural by projecting his original sketches onto large pieces of fiber board, tracing in the outlines and adding detail as he went along.

Mill spent a week of his vacation doing research for the projects in the archives of the State Capitol Building in Sacramento and in local libraries and historical societies. His research turned up old newspaper accounts describing early Christmas celebrations in California. The Livermore Laboratory library also helped by providing Mill with a bibliography listing articles written about California.

The final display, cut up in sections for ease in handling, was mounted on the roof of Bldg. 911 by personnel from the Maintenance Division (8222). They also assembled and mounted the 400 electric luminarias which outline

the building in a soft candle-like glow.

The Classified Chords, a recently organized Livermore Laboratory singing group under the direction of Ellen Cunningham (8233-2), will present an hour-long program of traditional carols tonight beginning at 7 p.m. The program, which will be presented from the steps of the administration building, weather permitting, will be open to employees and their families, as well as the general public.

For the benefit of camera fans who may wish to film the display, the photo lab (8123-3) suggests the following camera settings:

- Adjustable cameras—**
 Ektachrome (outdoor) with 80B filter —90 sec., F4.5
 Ektachrome (outdoor) with no filter —50 sec., F4.5
 Ektachrome (indoor) Type F —30 sec., F4.5
 Kodachrome (indoor) —60 sec., F4.5
 Kodacolor —60 sec., F8
 Verichrome Pan —60 sec., F11
 Pan X —60 sec., F11
 Super Anscochrome —15 sec., F4.5

Simple cameras—
 Kodacolor, Verichrome Pan, Pan X —60 sec.
 Movie cameras—Existing films for simple motion picture cameras are not fast enough to register an image under lighting conditions to be found at the display.

The display will be up through Jan. 2, 1961.

TRICK OF THE TRADE is revealed by Mill Taylor as he projects his small sketches on fiber board for final outlining and coloring. Operating the projector in left foreground is Frank Parr.

Retirement in Mexico For R. M. Chesnut After 10 Sandia Years

Robert M. Chesnut, supervisor of Secretarial Services Division 3126, will retire the end of December after 10 years at Sandia.

In mid-January Mr. Chesnut plans to travel to Mazatlan on Mexico's west coast which he has visited many times during the past 12 years to take advantage of the excellent deep sea fishing. This time he hopes to complete arrangements for purchase of a motel there and part-ownership of a fishing boat.

Mr. Chesnut spent two years in Venezuela and two years in Brazil as a materials engineer before coming to Albuquerque.

Until Mr. Chesnut gets settled in Mexico he will have the temporary address of 12381 McLeod St., Garden Grove, Calif., his married daughter's home.

Properties of Quartz Subject of Papers by Two Sandia Authors

Two technical papers by Sandia authors will be presented at a meeting of the American Physical Society in Berkeley, Calif., Dec. 29-31.

The papers are "Shock Induced Luminescence of Quartz" by F. W. Neilson and W. P. Brooks (both 5133) and "The Piezoelectric Response of Quartz Beyond Its Hugoniot Elastic Limit" by F. W. Neilson and W. B. Benedick (5133).

Both papers received prior publication in the *Bulletin of the American Physical Society*.

AEC Seeks Bids for Work to Modify Sandia Electrical System

The Atomic Energy Commission has advised contractors that bids will be opened about Jan. 10 for modifications to the underground electrical system in Tech Area I of Sandia Laboratory.

The project will include installation of government-furnished equipment. Work is to be completed within 100 days after the contractor receives notice to proceed from the AEC.

Vern Easley (4543-1) is Plant Engineering Department project engineer.

Corporation Sends Christmas Gift To Seriously Ill

About 40 baskets of fancy fruit will be distributed by Sandia Corporation to Albuquerque employees hospitalized or seriously ill during the holiday season.

The recipients are determined by joint action of department managers, Services and Benefits Division and Health Services Department.

The fruit baskets are to be picked up in Bldg. 829 on Dec. 23 by the immediate supervisors of the ill employees.

Boxes containing assorted cheeses and candied fruits are mailed to ill employees living out of town.

A similar program is carried out at Livermore Laboratory and Salton Sea Test Base during the holiday season.

Frances H. Wright Died December 12

Frances H. Wright died at a hospital Dec. 12 after a lengthy illness.

Mrs. Wright was a record clerk in Operations Division 3452 and had been with the Corporation nearly eight years.

Funeral services were held Dec. 14 followed by burial at Sunset Memorial Park.

Survivors include her husband, (who works in Division 2724), a daughter Elizabeth, and a son Glenn D., Jr.

CHRISTMAS CAROLS will be presented by the Classified Chords at the opening of the Livermore Laboratory Christmas display Dec. 23. The Livermore Lab singing group, headed by Bill Mack (8122-4), is under the direction of Ellen Cunningham (8233-2). Accompanist is Hal Norris (8121).

OPERATING new electronic bookkeeping machine at the Credit Union, Karoline Redic posts entries while Peggy Leyva replenishes supply of ledger sheets. The machine has cut posting time by half over the previous method used and has reduced operating costs.

"Don't Worry"—Bellamy

New Credit Union Statements Cause Some Raised Eyebrows

Sandia employees these days are taking a second look at their quarterly Credit Union statements. The form has changed and at first glance it looks as though interest rates have skyrocketed.

"Not so," says Credit Union Manager Dale Bellamy. "Instead of showing only the monthly interest on the statement, our new system shows the total interest for the loan. Our rates are the same and are as low as or lower than any in New Mexico."

By new system, Dale is referring to a new electronic bookkeeping machine that makes posting the transactions of the Credit Union on individual ledger cards a highly automated operation.

The new machine is a recent purchase of the Sandia Laboratory federal Credit Union.

"In any given month," Dale says, "the number of entries indexed in the ledgers averages 111,650. Installation of the new equipment has reduced the number of manual operations to 27,011 and has cut the processing time at least by half."

Utilizing this system, which has reduced operating costs of the Credit Union, meant also a change in the individual statements since the new machine must show total interest charges in order to perform the rest of its amazing functions.

As the operator inserts the ledger sheets into the machine, she punches on the keyboard the code number of the employee and the one entry of the new transaction. The machine does the rest. It elec-

tronically positions the sheet, picks up the old balances which are stored on magnetic "stripes" on the back of ledger sheet, computes the new balances, prints the figures and ejects the ledger sheet. All of this in a matter of a couple of seconds.

The new operating procedure went into effect at the Credit Union after a complete survey by Business Methods Department 4110. The Credit Union was operating at top capacity using the old equipment and during peak periods, the staff of the Credit Union was working double shifts to keep up with the workload. It was the recommendation of 4110 that the new equipment and system be installed. It will level the current workload plus providing for future growth of the Credit Union.

"After this initial shakedown period using the new equipment and system," Dale says, "we should be able to show substantial reduction of operating costs plus improving the service we offer members."

One new service, which will begin next month, is to make available statements of total interest paid by members during the calendar year. Members will be mailed a form in January from which they can request the service.

"Please don't wait until the last minute before the income tax deadline," Dale says. "If you want the interest statement, just fill out the form and mail it back to the Credit Union right away. You will receive your statement within a couple of weeks."

Lynn E. Castle to Retire from Sandia End of December

Lynn E. Castle, a Western Electric Company employee since 1937 and at Sandia since 1951, will retire the end of this month. He is supervisor of Technical Training and Education Division 3132.

Long active in community service projects, Lynn will be devoting a large share of his time in coming months working to promote a statewide Great Decisions program. Lynn organized the first Great Decisions program in Albuquerque in 1959 and served two years as chairman.

Lynn also is active in CASA, Coordinated Action for Senior Adults, as a member of the Board of Directors and chairman of the education committee. Between these two activities he plans consulting work in the areas of education and communication as well as teaching two Sandia Out-of-Hours courses beginning in January.

Also in the planning stage is a trip to Phoenix, Ariz., to visit his son and two grandchildren. Lynn will continue to reside in Tijeras Canyon, mailing address Rt. 5, Box 5450, Albuquerque.

Lynn joined Western Electric Company's training organization in 1937 at the Hawthorne Works in Chicago working primarily in the area of management training. He was a Department Chief at Hawthorne when he came to Sandia.

JANET JENKINS
—Christmas Cover Artist—

Janet Jenkins Designs Lab News Front Page Christmas Design

Designer of the 1960 Lab News Christmas cover is Janet Jenkins, who was a summer employee in Technical Art Division, 3463.

At the present time, Janet is touring Europe where she plans to stay for about six months studying design and art. She graduated from the University of New Mexico in June with a degree in Fine Arts.

SALVATION ARMY building site was appropriate location for picture showing awarding of the 1959-60 ECP reserve fund to the agency. Present were (l to r) Harold Burrell (4224), Metal Trades Council president and member of the ECP committee; John B. Irick, vice chairman, Salvation Army advisory board; J. W. Hook (4110), ECP committee member, and Capt. Elmer E. Yardley, commanding officer, Albuquerque Corps, Salvation Army. Fund totalled \$1250.

ECP '59-'60 Reserve Fund Is Given to Salvation Army

The one per cent reserve fund of the 1959-60 Employees Contribution Plan drive has been presented to the Salvation Army for its current building fund.

The action was voted by the ECP committee. The fund totalled \$1250.

The emergency fund, if unused at the end of the year, is annually presented to the agency or agencies deemed most in need of the additional funds. Last year the emergency fund was given to the United Fund when that organization fell short in its yearly campaign. The previous year the money in the reserve fund was given to St. Anthony Home for Boys to help in their building fund drive.

Mr. Peterson

E. J. Peterson New President of Metal Trades Council

Edward J. Peterson (4253), a member of Machinists Local 1689, will be installed as president along with other newly-elected officers during a Jan. 4 meeting of the Metal Trades Council.

He succeeds Harold E. Burrell (4224), who served three years as president and did not seek reelection.

Other new officers are: vice president, Anthony N. Chaves (2721), International Brotherhood of Electrical Workers, Local 1988; secretary-treasurer, Joseph A. Maldonado (4624), Chemical Workers, Local 387; recording secretary, Leland L. Pierce (4224), Teamsters, Local 492; sergeant-at-arms, Glenn Haycock (4512), Boilermakers, Local 338.

The three trustees elected at the same time were: A. Millie Oberle (3462), Office Employees, Local 251; Max B. Miller (4514), Operating Engineers, Local 953, and Jose B. Jojola (4513), Painters, Local 823.

A. P. Gruer Helping Plan International Telemetry Conference

For the second year, Allan P. Gruer, manager of Quality Assurance Operations Department 7530, is heading an effort of the National Telemetry Conference Board of Directors to arrange an international telemetry conference in Europe in 1963.

Al was re-appointed chairman at a recent meeting of the NTC directors in Washington.

During his vacation in Europe in October, Al made several contacts with technical societies in connection with plans for the international telemetry conference. The British Institution of Electrical Engineers are considering hosting such a meeting in London in 1963. The NATO Advisory Group for Aeronautical Research and Development has also indicated support.

Entry Blanks Ready For Coronado Club's Bowling Tournament

Entry blanks for the Ninth Annual Coronado Club Bowling Tournament are now available from bowling league secretaries or at the club, according to D. R. Kvarnstrom (7184), tournament secretary.

Deadline for entering is Jan. 4, 1961. The ABC sanctioned tournament will have competition for five-man teams, doubles and singles in all events. Tournament will be played at the club Jan. 7 through 17, 1961.

Jan. 1 Deadline for Applications to Enroll At U. of New Mexico

All employees planning to enroll at the University of New Mexico for the first time must get their applications to the University's Office of Administration and Records by Jan. 1, 1961. This applies to both undergraduate and graduate students who intend to attend UNM during spring semester.

CATHEDRAL SETTING for the Albuquerque Theater Arts Center Christmas concert at the Civic Auditorium was designed by Alexander Jack (3311-1).

At the far left of the picture is a multi-colored stained glass window, also designed by "Jack." He learned set designing while in the Navy.

Supervisory Appointments

THOMAS E. ZUDICK to supervisor of the newly-created Motion Picture Production Section 3465-1, Motion Picture Division.

Tom has been at Sandia since May 1952, first as a TDSR in Field Testing, a short period in personnel placement, and the remainder of the period in Public Relations Division.

While in Public Relations he wrote the script and co-ordinated the production of "The Sandia Story" and wrote and directed "Research and Development Highlights," one of a series of public information films.

Prior to joining Sandia Tom was administrative assistant to the director of rocket development at the U.S. Naval Ordnance Test Station at Inyokern, Calif., for a year. He also worked a similar period in the accounting department at the National City Bank of New York.

He holds a BA degree in political science and economics from the University of New Mexico. Tom is a member of the New Mexico Public Relations Conference and is a former national director of the American Society for Public Administration.

During World War II he served from 1943-46 in the Navy.

JOHN C. WEYDERT to supervisor of Special Projects Section 7133-1, Aero and Thermodynamic Department.

John has been engaged in aerodynamic design since he came to Sandia Corporation in September 1952.

Prior to employment here he was a valve designer three years for Edwards Valves Company in East Chicago, Ind. For one year before this time he was a research assistant on the research staff of Purdue University.

John earned his Bachelor's degree in mechanical engineering from Purdue in 1948 and a Master's of Science Engineering degree in 1951.

During World War II he was two and a half years with the Corps of Engineers stationed in Europe.

He is a member of Sigma Xi Research Honorary.

FERNE L. WHITE to supervisor of Product Information Processing Section 8161-1, Product Control Division.

Ferne joined Sandia Laboratory in 1953 and was assigned to the Standards Engineering Department where she processed engineering releases and engineering change orders. Later she assisted Drafting Services in scheduling and programming.

In 1957 Ferne transferred to the Product Definition Control Section at Livermore Laboratory, where she continued in engineering support activities. She became a Staff Assistant in April 1959.

Before coming to Sandia, Ferne was employed by the Continental Oil Company in Ponca City, Okla., for two and one-half years, and was chief accountant for a ready-mix concrete company in Ponca City for 16 years.

A native of Oklahoma City, Ferne attended Washburn College in Topeka, Kans. She also attended evening courses at Northwestern State College, Weatherford, Okla., and the University of New Mexico.

WILLIAM D. ULRICH, JR., to supervisor of Section 7183-1, Weapon Compatibility and Applications Division.

"Bill" has been with Sandia Corporation five and a half years. During that period he has been connected with the same project although it has been the responsibility of different organizations.

Prior to coming here he received a Bachelor's degree in mechanical engineering from the University of Arizona.

He is a member of Theta Tau, professional engineering fraternity, and Tau Beta Pi engineering honorary.

During World War II, Bill served three years in the Marine Corps.

KENNETH L. GOIN to supervisor of newly-created Hypersonic Tunnel Section 7132-3, Aero and Thermodynamics Department.

Ken has been at Sandia two years this month engaged in applied aerodynamic research.

For six years prior to joining Sandia, Ken was employed by Convair at Daingerfield, Tex., engaged in experimental and theoretical aerodynamics projects.

Prior to this he held the position of aeronautical research scientist with the National Advisory Committee for Aeronautics at Langley Field, Va.

During World War II, he was an officer aboard a mine sweeper which saw sea duty in both the Pacific and Atlantic.

Ken received his Bachelor's degree in mechanical engineering from Oklahoma University in 1944.

M. DWAYNE BENNETT to supervisor of Aerophysics Section 7131-1, Aero and Thermodynamic Department.

Dwayne has been with Sandia Corporation four years engaged in aerodynamic research.

For seven years prior to joining Sandia he was an aerodynamic engineer with the Ordnance Aerophysics Laboratory at Daingerfield, Tex.

Dwayne attended Texas A&M College earning his Bachelor's degree in 1949 and his Master's degree the following year. Both were in aeronautical engineering. He was a member of the Honor Society in college.

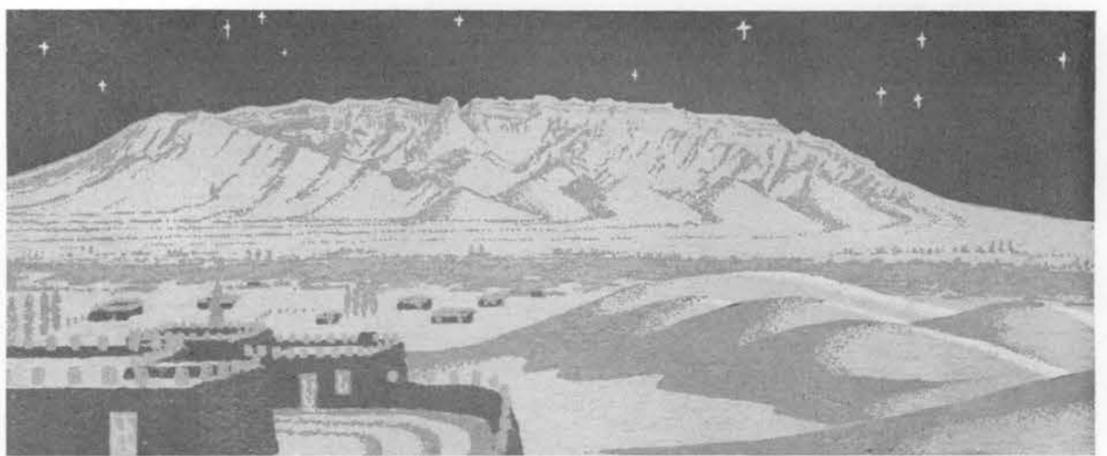

In 1945-47 he performed intelligence work at Fourth Army Headquarters in Germany.

Sandia Employees at Livermore Provide Christmas Dinners

Christmas dinners for four needy families were provided by volunteer contributors at Livermore Laboratory. The families were "adopted" by the Livermore employees through the help of the Christmas basket committee of the Council of Social Planning.

Sixteen children in the families also received needed items, such as shoes and clothing.

Two Livermore Laboratory organizations, 8114 and 8223-3, also contributed toys, food and clothing to brighten up Christmas for other needy families.

VIEW FROM LOS ALTOS of Albuquerque and the Sandia Mountains inspired the drawing which is the cover of Sandia Corporation's Christmas card this

year. In the left foreground is the walled pueblo-style community of Los Altos outlined by luminarias. Eight Sandia families reside at Los Altos.

Holiday Lights

Los Altos Luminaria Display Will Again Attract Thousands

Los Altos is a walled pueblo-style community of about 30 homes perched on the West Mesa. The view of Albuquerque and the Sandia Mountains from Los Altos is magnificent.

Every year at Christmastime, Los Altos itself becomes a magnificent sight. The residents of the community, including eight Sandia families, light some 6000 luminarias. The entire community—roofs, walks, walls and streets—is outlined in the soft glowing lights of the luminarias.

This scene is depicted on the Christmas card used by Sandia Corporation this year.

To Jim Marsh (3423-2) and other members of the Los Altos Civic Association, the lighting of the luminarias is a tradition that goes back 10 years in their community.

"But the tradition of luminarias," Jim points out, "was started by the earliest Spanish settlers of the Southwest who lit small fires on Christmas Eve to guide the arrival of Joseph and Mary to the inn. This was usually part of a community Christmas pageant."

Community participation at Los Altos includes joint purchase of the 6000 candles and brown paper sacks to make the luminarias, plus every resident participating in the placement and lighting of the luminarias on Christmas Eve.

"It takes about an hour," Jim says, "after the bags have been prepared and if the weather isn't too bad."

When the luminarias are lit, traffic through the community becomes practically bumper-to-

bumper. Youngsters of Los Altos direct the cars through the curved streets. For the past couple of years, Los Altos has been one of the highlights of the Albuquerque Chamber of Commerce-sponsored Christmas lighting tour. As many as 13 busloads of people have made the tour.

Sandians who live in Los Altos include Jim, C. J. McGarr (4600), Florencio Baca (4574), L. L. Lavanier (4361), L. H. Stratford (2533), H. E. Harling (3428), Maude McCarthy (1312) and F. E. McCulloch (1112).

A. Marie Thompson to Retire Dec. 30 After Eleven Sandia Years

A. Marie Thompson, who has worked in Sandia's print shop (3462) for 11 years, will retire Dec. 30.

Mrs. Thompson will remain in Albuquerque and continue to make her home at 721 Kentucky SE with her married daughter, Betty McKinstry, who also works at Sandia in Division 3462. Two grandchildren—a girl eight years old and a boy a year and a half—will help keep her busy.

Aside from family, Mrs. Thompson is looking forward to gardening and visiting a sister in Salt Lake City.

FASCINATION of lighted luminarias is reflected in the faces of Los Altos children. From left are Ann Marsh, Ricky Lavanier and Pam Harling. Some

6000 luminarias are used each year as a Christmas Eve display. Sponsored by the Los Altos Civic Association, the annual tradition started 10 years ago.

Contract Let for Remodeling Work On Building 854

Bradbury and Stamm Construction Co., Inc., Albuquerque, is apparent low bidder for modifications to Bldg. 854, according to an announcement by the Atomic Energy Commission. The firm's bid of \$72,395 was the lowest of seven received.

The work will include remodeling a portion of the existing building including general construction, heating, ventilating and evaporative cooling, plumbing, electrical power and lighting services, and new sewer and water services.

Work is to be completed within 100 days after the contractor receives notice to proceed from the AEC.

The remodeled area of the building will be utilized as office space for Control and Field Inspection Department 2710. The modification will also provide laboratory space for Inspection and Evaluation Department 2720.

Plant Engineering project engineer is V. E. Kerr (4543-3).

Sandia Men Help Author Handbook on Rocket Sled Design

Area III Laboratory Division 7323 personnel have contributed three sections to "Rocket Sled Design Handbook," a new book by McGraw-Hill Publishing Company. D. L. Krenz and W. H. Cross collaborated on "Sandia Corporation Test Track Safe Operating Procedures" and "Photographic Information and Types of Tests." D. W. Bauder contributed "Sandia Corporation Track."

Policy Changed on Lab News Observance Of Service Awards

As time passes changes take place and one of these changes is going to be in the method the SANDIA CORPORATION LAB NEWS observes service anniversaries of Sandia employees. From now on, pictures of employees receiving 10-year service awards will not appear, but their names and organizations will be listed. Pictures will continue to be published of those receiving 15-year awards. Also the LAB NEWS will no longer list the names of employees receiving five-year awards. The LAB NEWS is having space problems and the large number of 10-year service anniversaries to be observed in the future would take upwards of a page of space in some issues.

First Year of 'Soaring 60's' Busy at Sandia Corporation

High temperature solar furnace

Chariot study in Alaska

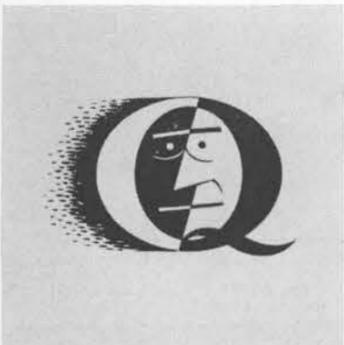

Armed Forces Day Visitors

Huge crater left by Scooter shot

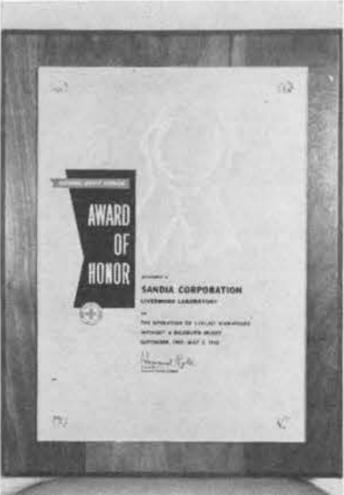

Laboratory Bldg. 861

Livermore's new security symbol

Graduating apprentices

Top safety award for Livermore

Livermore United Fund drive

Radar target at Tonopah

The year 1960 brought about many changes as this review of articles which appeared in the LAB NEWS will indicate.

Peacetime research projects, reorganization and a continuing search for knowledge on the part of employees were some of the activities during the 12 months.

January

Applications were taken for Sandia's first Electronics Apprenticeship program. The four-year program includes on-the-job training, theory and classroom study.

D. S. Tarbox was promoted to Director of Security and Industrial Relations 3200. His predecessor in the position, G. A. Parker, was transferred to WE's Hawthorne Works as Superintendent of Relay and Capacitor Shops.

Kenneth A. Smith was also promoted to Director of Information, Publications and Public Relations 3400.

Mr. "Q" was adopted as symbol of security at Livermore Laboratory.

February

James W. McRae, Sandia Corporation President from September 1953-October 1958, died suddenly in New York City. At the time of death he was vice president of the American Telephone and Telegraph Company.

J. P. Molnar, President, and G. A. Fowler, Vice President, Research, were named Fellows of the Institute of Radio Engineers for their outstanding contributions to radio engineering or allied fields.

More than 1000 employees were enrolled in the spring semester out-of-hours courses. In addition, about 400 employees were furthering their education on the university level under the Educational Aids Program.

March

Project Cowboy, seismic effect studies based on 17 high explosive tests in a salt mine near Winnfield, La., was concluded. Sandia Corporation employees from Albuquerque and Livermore participated.

Livermore Laboratory supported preliminary study for the Alaska "Chariot" portion of Project Plowshare, involving the potential use of nuclear explosions for peaceful purposes.

Announcement was made by the AEC that Salton Sea Test Base in California will be placed on a standby basis by mid-1961.

A briefing was held at Sandia Laboratory for AEC Chairman J. A. McCone and other high AEC officials.

The entire Development Shops in Bldg. 840 were closed down so that employees could attend the graduation of the first five men to complete Sandia's apprenticeship program for machinists.

April

Materials and Standards laboratories and offices moved into newly-completed Phase I of Bldg. 861.

A second solar furnace went into operation for use in testing of materials in temperatures up to 7000 degrees F.

The AEC approved construction and site preparation for Project Gnome—detonation of nuclear explosives in a tunnel in the salt bed formation near Carlsbad, N. M. The project is part of the Plowshare series.

The AEC let a \$279,000 contract for additions to the Tonopah Ballistics Range in Nevada.

May

On Armed Forces Day thousands of visitors crowded through Sandia's Sphere of Science to view 17 scientific and technical exhibits.

Valley Memorial Hospital supplemental drive opened at Livermore Laboratory with employees pledging \$26,261, including a Corporate gift of \$3,000. The total contributed by employees and the Corporation hit \$64,819.

June

A contract was awarded by the AEC for installation of a Cockcroft - Walton accelerator for use by Physical Sciences Re-

search Department and Electrical Standards Division.

Livermore Laboratory participated in Plowshare Project Pinot, chemical high explosive studies investigating the use of nuclear explosives for peaceful purposes.

Sandia Corporation's Group Retirement Plan has been in effect for 10 years. In addition to those persons already retired, an additional 189 employees are 75 per cent vested in the plan.

Livermore Laboratory received the National Safety Council Award of Honor in recognition of 3,101,421 man-hours worked without a disabling injury.

July

Supplemental agreements were signed between Sandia Corporation, the Metal Trades Council and the Office Employees International Union covering wages and Health Care Plan changes. The contracts will terminate July 5, 1961.

Sandia Laboratory employees were excused from work to attend a special open air ceremony at which Dwight A. Ink, Assistant General Manager, AEC, presented a large trophy to President Molnar in recognition of the Lab's all-time nationwide AEC-contractor safety record. On July 1, Sandia Lab's record was 12,722,170 man-hours without a disabling injury.

Livermore Lab, at the same ceremony, received the AEC's Award of Honor for 3,101,421 employee hours without a disabling injury.

Bids were received for construction of buildings to house a pulse nuclear reactor. The \$550,000 facility will be located near the larger Sandia Engineering Reactor.

August

Fiscal Year 1960 construction at Sandia Laboratory totalled nearly \$8,000,000, including new buildings, additions and modifications to existing buildings and facilities.

S. P. Schwartz was named President of Sandia Corporation, effective Sept. 1, succeeding J. P. Molnar, who returned to Bell Telephone Laboratories to become Executive Vice President on Dec. 1. Three new vice presidents were named and three new directors were appointed.

Fourteen on-roll engineer Staff Members were selected to enroll in the second year of the Technical Development Program. A group of 70 newly-hired engineers will also start the TDP during the University of New Mexico's fall term.

The Department of Defense Scientific Advisory Committee on Ballistic Missiles met at Sandia Laboratory to review the nuclear ordnance program.

Representatives of the Albuquerque Guards Union, Local 27, and Sandia Corporation signed a one year supplemental agreement on wages and Health Care

Plan participation.

A bid of \$1,279,000 was accepted by the AEC for construction of the new Research Building, Phase II of Bldg. 861.

September

Sandia Corporation facilities at Cocoa Beach, Fla., were damaged slightly by Hurricane Donna.

Sandia Laboratory's national safety record was terminated at 14,936,168 employee-hours when an electrician at a Sandia site injured his knee while descending a powerline pole.

The fourth annual ECP drive was underway at Sandia Laboratory to benefit 33 health, welfare and youth service agencies.

Seven more machinist apprentices completed the two and a half year training to become journeymen.

Sixty out-of-hours courses were offered at Sandia Laboratory with a record number of student-employees expected.

United Bay Area Crusade at Livermore resulted in \$9,711 collected from employees and a Corporation gift of \$1,550.

October

"Scooter" test, part of Plowshare program, left a huge crater in the Nevada desert. Blast of 1,000,000 lbs. of TNT was largest conventional chemical high-explosive detonation in the U. S. Sandians participated in the project.

Members of the Plowshare Advisory Committee met at Sandia Laboratory to discuss safety aspects of the proposed Plowshare Projects Gnome (underground nuclear explosion near Carlsbad, N. M.) and Chariot (Alaskan excavation experiment).

November

Sandia Corporation co-sponsored a 12-day National Security Seminar for Albuquerque civilian leaders and Armed Forces reserve officers.

The Sandia Corporation employees sought political posts in the general election. All but two were successful.

Technical and Trades Training Division was pleased with new technique in teaching — Programmed Self Instruction. Three courses have been utilizing this new industrial education method.

Livermore Laboratory management was represented at a Washington, D. C., dinner honoring participants in the development of the Polaris missile.

December

Final figure for the recent ECP drive at Sandia Laboratory was \$136,740, with employees accounting for \$124,240 of the total.

Arrangements were completed for Operation Moonlight—three TNT blasts to disperse natural uranium in Albuquerque's southeast area. Data from collection devices will help determine effects of accidents involving nuclear reactors or chemical explosives in nuclear weapons.

ABOUT THE NICEST part of Christmas is the giving and receiving of gifts. Here Joan Jackson (4413-4), after the hours of Christmas shopping, puts the finishing wrapping on presents she will be giving.

Sandia's Safety Record

**Sandia
Laboratory
HAS WORKED
150,000 MAN HOURS
OR 5 DAYS
WITHOUT A
DISABLING INJURY**

**Livermore
Laboratory
HAS WORKED
